

PERFORMANCE

Sleep better and perform better.

Your support needs change when you are on your back vs. your side...or based on what you did today. In order to relieve pressure in precisely the right spot, the ReST Bed™ has 5 independently variable zones that anatomically correspond to your body. The ReSTdash™ app records sleep data, empowering you with the information you need to perform your best.

Beyond “wearables.”

The ReST Bed™ collects sleep data, which gives you the benefits of wearable technologies without changing your normal habits or routines. You no longer have to remember to turn a device on before going to sleep or adjust your sleeping position to accommodate a device. Of course, a ReST Bed™ not only collects sleep data, it also proactively helps you sleep better in the first place!

Perform your best with ReST™

TECHNOLOGY

The world’s first #smartbed.

Patented pressure-sensing fabric allows for automatic response, tracking sleep data, and integration into connected home technologies.

2015 CES Innovation Award Winner.

The ReST Bed™ was highly honored at CES because it is a technology-based solution for better sleep. Since sleep is a series of states, the sleeping surface must be dynamic as well. The ReST Bed™ makes automatic, real-time adjustments. Further, the

ReSTdash™ app allows you to access your sleep data in the cloud as well as to integrate with connected home technologies so you can control your entire sleep environment.

LUXURY

Modern luxury to pamper you.

The cradling comfort you get from the ReST Bed™ provides the perfect amount of support for every part of your body, whatever your sleeping position. This is possible because the ReST Bed's™ surface continuously reads your pressure points, then softly and quietly adjusts to deliver a customized sleep experience.

Three elements of luxury.

High-end cars and watches blend modern technology with time-honored traditions. Every design detail contributes to comfort and aesthetics. The ReST Bed's™ top level fabric is often used in work-out apparel because of its breathability and contouring. Our energex foam combines the pressure relief of memory foam, the resilience of latex, and the cooling of gel. We selected high airflow materials that promote a refreshing sleeping experience and that ensure ventilation.

Perform your best with ReST™

A ReST Bed™ is a safe choice.

Backed by a comprehensive 10 year non-prorated warranty covering defects in materials and workmanship for all of the following components:

10 YEAR WARRANTY

HOW IT WORKS

HEALTH

Sleep is part of the Health and Wellness Trifecta...

...and a ReST Bed™ contributes to better sleep.

While you can't always control when you go to bed and when you wake up, the ReST Bed™ ensures you maximize the time you spend in bed. The ReSTdash™ app provides insights into body position and movement which may aid sleep doctors in diagnosing sleep disorders like apnea, insomnia, or restless leg syndrome. You can also adjust your ReST Bed's™ settings in response to your doctor's recommendations.

*Some of these features may require a paid subscription.
